Patent No. 6458591
GENERAL INFORMATION:
APPLICANT: Brett P. Monia
APPLICANT: Jacqueline Wyatt
TITLE OF INVENTION:
ANTISENSE MODULATION OF PHOSPHORYLASE KINASE ALPHA 2
FILE REFERENCE: RTS-0136
CURRENT APPLICATION NUMBER: US/09/657,453A
CURRENT FILING DATE: 2000-09-07
NUMBER OF SEQ ID NOS: 105
SEQ ID NO 51
LENGTH: 20
         TYPE: DNA
ORGANGE: Artificial Sequence
FEATURE:
OTHER INFORMATION: Antisense Oligonucleotide
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            US-08-501-713-6
